

## CHANGE AND RESILIENCE -PROFESSIONAL DEVELOPMENT ONLINE TRAINING

<b>AIM</b>	<p>Life brings change. As the adage goes: ‘The only consistent thing in life is change. We cannot avoid it, some of us fight it, and a few struggle to accept it.’</p> <p>Change is inevitable. It happens all the time, whether we are ready for it or not. It can be natural and voluntary, or imposed upon us such as through a serious illness, a life-altering accident, a relationship breakup, losing our jobs, and death of our loved ones. Becoming more resilient helps us get through difficult circumstances, empowers us to grow and improve our life.</p> <p>Change and adversity affects people differently. How we adapt and bounce back determines our resilience. Some people may feel threatened by change and respond with fear to avoid the change. Others see change as a challenge and creatively look for ways to turn that change into an opportunity. The way we <i>respond</i> to change is our choice. Being resilient does not mean that we will not experience difficulty or distress. The road to resilience is likely to involve considerable emotional distress.</p> <p>Change can afford us the opportunity and the challenge to review our life to create new scenarios and relationships. It can involve profound personal growth. Increasing resilience takes time and intention. Resilience involves behaviours, thoughts, and actions that we can learn and develop.</p> <p><b>Aim</b></p> <p>Empower individuals through the process of change, implement strategies, and build resilience for a successful transition into your next stage</p>
<b>COURSE CONTENT</b>	<p>A short inspirational story</p> <ol style="list-style-type: none"> <li><b>1.
